

UMAP of GAP Embeddings by Onset Phoneme Class

Untrained (random weights)

Trained

- Plosives (/p,b,t,d,k,g/)
- Fricatives (/f,v,s,z,h,sh/)
- Nasals (/m,n/)
- Approx/Glides (/w,j,r,l/)
- Vowel-initial
- Other

Words grouped by onset phoneme class. If trained model clusters by onset, it uses acoustic features; if by word identity, it has learned abstract representations.
